Atlantean Horoscope

The Atlantic Horoscope has its origin in customs long believed forgotten. It has its roots in Atlantis, an island around which many legends have been woven and whose secret could never be completely discovered. The famous Greek philosopher Plato wrote about this mythical island in the Atlantic Ocean, which sank into the sea, in his scripts "Timaios" and "Kritias" more than two thousand years ago. One of the numerous interpretations suggests that Atlantis was a land bridge between Europe and America.

One of the fundamental principles of the Atlantic Horoscope is based on the recognition that the individual character of a person has a counterpart in nature. Based on this recognition, the different dispositions and natures have symbolic flowers and their blossoms assigned to them. Next to the exact date of birth, eye color and hair color play a critical role in precisely determining the inherent talents and opportunities of the respective people. Based on these features in appearance, each individual can be related to a particular element - air, water, fire or earth.

Unlike many other astrological interpretations, the Atlantic Flower Horoscope is not comprised of an exact future prognosis. It tends more to show the characteristics and aptitudes which will shape the development of a person. Heinrich, if you heed this knowledge and reasoning you will be able to fashion your life in a promising and successful way. In accordance with the Atlantean customs, you are solely responsible for using the opportunities handed to you for a happy and fulfilling future.

Summary

**Your Birthdate:
03/03/2008**

**Your hair color:
Blond**

**Your eye color:
Blau**

**Your Element:
Air**

**Your Temperament:
idealistic**

**Your Flower:
Narcissus**

**Your Color:
golden yellow**

**Your Lucky Gem:
Opal**

The Airy and Idealistic Narcissus

Your richness of ideas and your distinct powers of imagination constantly inspire your thoughts and lead to a noticeable broadening of your consciousness. Thereby your ideas will not be influenced by traditional theories and well-known insights - you will strive much more to develop alternatives and venture into unexplored areas.

It will be very important for your further development that you are more casual and more open-minded with the people around you. Accordingly, you shouldn't endeavor to carefully guard your knowledge and opinions in an inaccessible treasure chest - instead it's in your own best interests to let your surroundings share in your intellect. Heinrich, you have valuable and unusual suggestions to make which could point the way ahead.

Even if your sensibility and sensitivity don't spur you immediately to determined and energetic action, you should, however, come out of your shell more and give up your unwarranted reticence. For there is absolutely no reason to be unsure of your own capabilities and potential. If you could get a large circle of people interested in your ideas, that would help a great deal in the development of your self-confidence. You will then be capable of things that, with your modest nature, you had not even dreamed of. In this you will gain an important quality: as soon as you are free, you will untiringly concentrate on the achievement of your goals.

The airy and idealistic narcissus gets on very well with the passionflower, the poppy, the foxglove, and the iris.
